

FEATURE FOCUS AND CRANK WELDING REEL

EXPLODED ASSEMBLY:

FEATURES & BENEFITS

STEEL CONSTRUCTION

High-Quality steel construction provides superior strength and durability for heavy-duty applications in commercial and industrial settings.

WELDING GAS SWIVEL

Designed for Oxy-Acetylene and T Grade twin line welding hose. Dual machined from solid brass 90° full-flow 3/8" NPT swivels (1 on each side of the reel) for simple VITON® seal maintenance and fast and easy hose installation. No need to remove the reel from its mount.

2 **TENSION BRAKE**

Adjustable tension/friction brake adjust the speed of the draw to your desired preference & prevents your reel from "free wheeling'

3

PILLOW BLOCK BEARINGS

Pillow Block Bearings - Sturdy permanently lubricated and self-aligning pillow block bearings for smooth rotation and trouble-free operation.

- Robust lubricated horizontal surface mount bearings on 1-1/2" and 2" hose I.D models.

FRAME 4

Sturdy one piece, all CNC robotically welded 1/4" steel "A" frame base, not bolted, for superior reel structure.

Mounting Pattern - Mounting pattern located in the steel base for easy reel installation and detachment.

POWDER COAT

CPC[™] Powder Coat. Long lasting, chip resistant and rust inhibiting CPC[™] powder coat finish seals all steel components for maximum corrosion resistance.

5 LOCKING PIN

Long-handled locking pin secures reel from rotation during storage or transportation

6 **OUTLET RISER**

Exclusive low profile outlet riser and open drum slot design provides a non-crimping, flat smooth hose wrap.

CNC SPUN DISCS

Heavy duty CNC robotically spun and ribbed discs with rolled edges for greater strength, durability, hose protection and operator safety.

8

BEVEL HAND GRAN

Solid steel direct hand crank with smooth round handle for easy mechanical retraction.
